

Product Serial Number Guide

Here are a few tips on where to find your CTC product's serial number and what it means:

Example of data plate

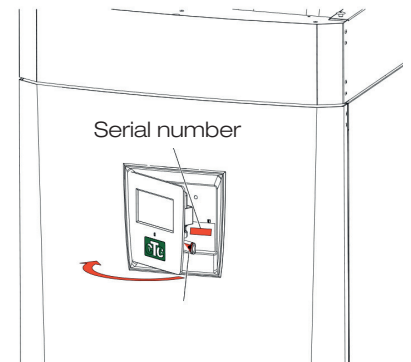

- Two data plates are mounted to the product, one large and one small.
- Example of a product serial number: **7312-1712-0719**.
The first four digits indicate the type of product, the second four indicate the manufacture year and week. In this example: CTC EcoAir 510M, 2017 week 12. The last four digits indicate the sequential number.

CTC GSi 12 (serial number begins with 7310-)

CTC EcoZentih i350 L/H (serial number begins with 7208-)

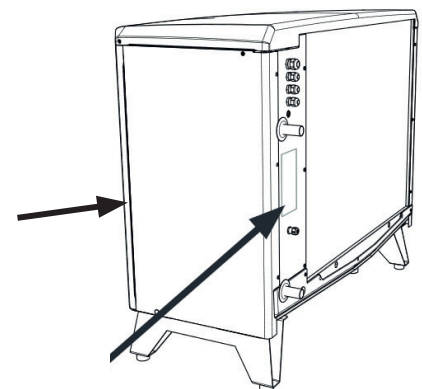

- The serial number plate is located behind the display. Carefully lift up the display from the right-hand side. In some cases, the serial number plate may be located on top, underneath the cover.
- The data plate with the product's serial number is located behind the front panel by the electrical cabling.

CTC EcoZenith i250 L/H (serial number begins with 7208-)

CTC EcoHeat 400 (serial number begins with 7310-)

- The serial number plate is located behind the display. Carefully lift up the display from the right-hand side. In some cases, the serial number plate may be located on top, underneath the cover.
- The data plate with the product's serial number is located behind the front panel, on the inside of the right-hand side panel. Pull the cover forwards and lift, loosen the 2 screws on the top and open the front with care.

CTC EcoAir

CTC EcoAir 406 – 410 and CTC EcoAir 510M

(serial numbers begin with 7312-)

CTC EcoAir 415 – 420 and CTC EcoAir 520M

(serial numbers begin with 7311-)

- The serial number plate is located at the rear by the pipes.
- The data plate with the product's serial number is located inside the plastic front panel. Loosen the 2 screws at the sides of the upper panel and remove the front panel.

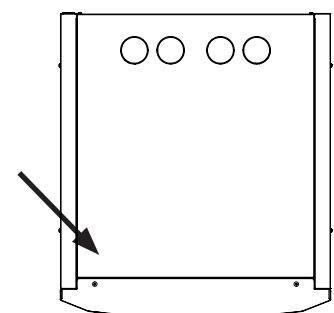

CTC EcoPart, CTC EcoPart 425-435 and

CTC EcoPart Pro i425-i435 (serial numbers begin with 7301-)

- The data plate with the product's serial number is located on the top of the product.

CTC EcoZenith i 550 Pro (begins with 7250-)

- The data plate is located on the side of the product.

CTC EcoPart
